

The Brazilian Blowout Keratin Treatment: How to Do It

You've probably heard of the **Brazilian blowout solution** if you keep up with the latest hair care trends. A Brazilian blowout is a type of hair treatment that can leave your hair shiny, frizz-free, and moisturized for up to three months.

Do you want to have shiny, frizz-free, silky hair? Even the most obstinate hair types can be helped! **Thairapy Salon's** Brazilian Blowout Professional Smoothing Treatment can completely transform your dry, damaged, frizzy, or unruly hair into silky smooth strands that last for 12 weeks.

A Brazilian Blowout Treatment must be performed by a licensed stylist. If you want silky smooth hair, ask your stylist about the [Brazilian blowout solution](#) and then go shopping at the Fashion and Beauty Store! Visit Thairapy Salon if you're looking for a reputable salon for **natural red hair with blonde highlights**.

Let's get started on learning how to do a Professional Brazilian Blowout Smoothing Treatment:

- Use Brazilian Blowout Anti-Residue Shampoo to cleanse your hair. Don't be afraid to wash your hair several times because the treatment works best on clean hair.
- Towel dry hair gently to remove excess moisture. Don't overdo this step because the hair needs to stay wet throughout the treatment.
- Divide the hair into four panels, two at the base and two at the top.
- Determine the appropriate amount of Brazilian Blowout Original Solution. The quantity used is decided by the length and thickness of the hair. Short hair requires 1/4 to 1/2 oz., medium-length hair requires 1/2 to 3/4 oz., and hair longer than shoulder length requires 3/4 to 1 oz. of resolution.
- Apply the solution to the two back hair panels. Apply the product to 1/2" to 1" wide sections of hair. Apply the solution 1/4" to 1/2" away from the scalp. It should only be lightly dusted onto the

hair with a color applicator—no need to saturate it. After applying it with the colour applicator, pull the solution through each section with a fine-tooth comb.

- Apply the solution to the two front hair panels. Using the color applicator, apply the solution to the roots of the hair in the front sections and comb through with a fine-tooth comb.
- Straighten and smooth your hair to the best of your ability. To prevent steam from being released, keep the blow dryer at least 2 inches away from the hair.
- Flat ironing the hair is recommended. This step seals in the Brazilian Blowout solution while also protecting the hair with a protein layer.
- Rinse the hair for 1-2 minutes with warm water. For this step, avoid using shampoo.
- Apply the Deep Conditioning Masque liberally. Work it through your hair for about a minute before rinsing and towel drying
- Working up from the ends, apply a nickel-sized amount of the Smoothing Serum to the hair.
- Blow dry the hair one more time and style it as desired.

Now that you understand the procedure, you will know which step your stylist will take next and how long the procedure will take to complete. If you are looking for a place to get [natural red hair with blonde highlights](#), visit **Thairapy Salon**.
